# CS4322 Lab 1

Requirements

Implement the application:

Here are screenshots of the lab application:

There are several important points that are general requirements for assignments in this course:

- Include a comment at the beginning of the main source file you submit that includes your name and the assignment number.
- Names for variables and other program components should be chosen to help convey the meaning of the variable.
- Turn in an archive of the entire project for each assignment. Do not attempt to turn in individual files.

Submit your work using appropriate link in Desire2Learn.
